PROFILE

Software Engineering/Could and DevOps with hands-on experience in web application development, from the requirements gathering phase through development, testing, and deployment in the cloud. I prioritize best practices, security and scalability to ensure high-quality software in every project.

Experience developing with technologies such as React, Typescript, and Node, and I am well-versed in modern development practices including end-to-end testing, Clean Architecture, and SOLID principles. Additionally, I have management skills to lead web development projects, ensuring smooth collaboration and successful project delivery. While I am familiar with AWS services like Route 53, EC2, S3, and RDS, I focus on leveraging my knowledge to support project needs effectively.

- EXPERIENCE**
- JS engineer intern at itransition** **August 2024 – December 6**

 - Contributing to full stack development tasks, focusing on creating entire real web application, specifically enterprise software.
 - Applying new technologies such as React and TypeScript, while making strong bases in languages as SQL
 - Collaborating with senior developers to resolve issues, ensuring high-quality project delivery in a fast-paced environment.
 - Implement ready to production solutions such as ORMS, UI libraries, search engines to make apps as fast as possible
- Freelance Full Stack Developer** **January 2024 - July 2024**

 - Developed and delivered 3 responsive websites using Next.js, TypeScript, MySQL, Tailwind, Node.js, and Express.js, resulting in an average 30% increase in potential customer engagement for clients.
 - Optimized SEO and improved website load times through various performance techniques, ensuring a smooth user experience and better visibility in search engines.
 - Implemented robust features such as authentication, authorization, password recovery, password hashing, email systems, and API integrations to enhance website functionality and security

- SIDE PROJECT**
- BEESMRT**

 - I lead the development of a web application aimed at improving users' English skills through dynamic and engaging role-playing games. In this project, I use technologies such as React, TypeScript, Tailwind, Bun, Hono.js, MySQL, Drizzle ORM, Playwright, Vercel, AWS, and Docker. In addition, I supervise a team of six people, managing different aspects of the project, such as documentation, development, and testing.
- FormMaster**

 - Developed a web application for creating customizable forms, surveys, and quizzes with real-time data analysis. Utilized technologies such as Next.js, Tailwind, MySQL (AWS), Drizzle ORM, Auth.js, and Cloudflare R2, optimizing queries, secure authentication, and storage.

- EDUCATION**
- Universidad Tecnologica de la Riviera Maya**
Associate degree in Multiplatform Software Development

- SKILLS**
- Programing Languages:** Javascript, Typescript, Node.js, SQL
 - Frameworks:** React, Next.js, Express, Hono, Tailwind CSS, Nest.js
 - Cloud Services:** AWS , Cloudflare, Oracle Cloud
 - Tools:** VS Code, Git, GitHub, Docker, Playwright, Selenium, Vite
 - Other Skills:** REST, NoSQL, Nginx, Apache, Linux, Kubernetes, GitHub Actions
 - Soft Skills:** Leadership, communication, scrum.

- LANGUAGES**
- English :** B2 ITEP Certified
 - Spanish :** Native
